

TERRO®

Reusable - Dual Action Wasp & Fly Trap Plus

Reutilizable – De Doble Acción Trampa Para Avispas y Moscas y Además Para Moscas de la Fruta

Fruit Fly

Stink-Free Bait

Attracts & Traps: Wasps,
Hornets, Yellow Jackets,
Flies & Fruit Flies

Directions for use:

Filling the trap:

1. Pour bagged concentrate lure into trap.
2. Add water to fill line on the trap.
3. Remove cap from small fruit fly trap and attach to underside of trap lid.
4. Close the trap lid.

Using the trap:

1. Hang or place trap approximately 5 feet high in sunny area where it will not be exposed to high winds. Do not hang traps near nests. Relocate trap after 2 days if catch rate is low.
2. After 4 weeks, or when 2/3 of lure is filled with insects, empty the trap and refill. If live insects are present, close Bug Lock Lid™ and shake trap gently to immobilize insects before emptying. If lure is spilled, remove and wash contaminated clothes immediately to avoid stains.
3. Wash hands with soap and water after trap maintenance.

Tips for use:

- Wasps are not normally active at night or in early morning. Therefore, this is the best time to place and service the trap.
- Flies prefer warm, bright, calm areas.
- Fruit flies may inhabit areas with ripening fruit. If present around your home, trap will help control these pests.
- Will not attract beneficial pollinators, such as honey bees and bumble bees.
